

# CS698N: Final Project Report (continued)

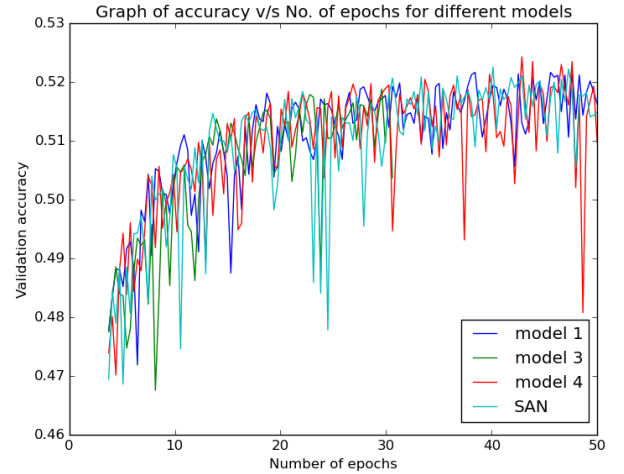

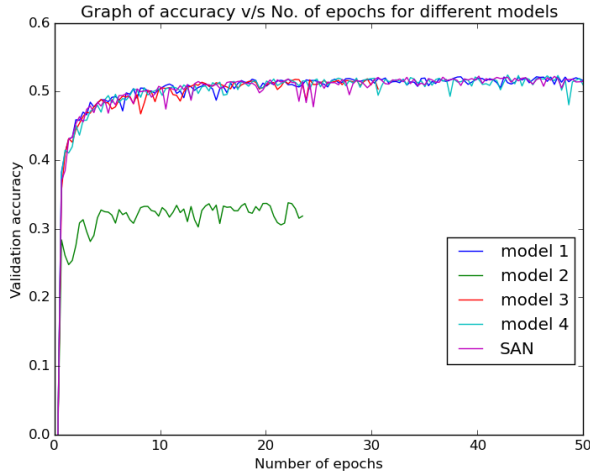

Prakhar K, Preetansh, Viswanadh

November 9, 2016

This is the additional page for results section. The results table we obtained for different models is updated (new results highlighted in RED):

Model	Best Validation Accuracy (%)	No. of epochs
SAN (paper)	52.255	50
model 1	52.213	50
model 2	35.5	20
model 3	51.878	30
model 4	52.424	50

We would also like to include the graph of Validation accuracy v/s No. of epochs for all the models:

It can be inferred that:

1. Performances of all the models get saturated by 50 epochs.
2. Performances of SAN, model 1, model 3, model 4 are similar.
